

ServiceNow Incident — Outputs & Test Results

Screenshots extracted from the supplied project document, covering mandatory validation, successful save, reverse-condition testing, list-edit blocking, and form-based updates.

Test Output 1

- The Incident should **not be saved** because Assigned To is required when Impact is High.
- An **error message** should appear, indicating that the Assigned To field cannot be empty.
- Confirm that all UI Policy actions, such as read-only fields or automated urgency updates, are working as expected.

Test Output 2

Activity 2: Test Successful Save

1. **Fill the Assigned To Field:**

Open the Incident form and select a user in the **Assigned To** field. This ensures the onSubmit Client Script condition is satisfied.

2. **Click Submit:**

Attempt to save the Incident record.

3. **Verify the Result:**

- The Incident should be **saved successfully** without any errors.
- Confirm that all other configured behaviors, such as:
 - **Urgency auto-setting** (from the onChange Client Script)
 - **Read-only fields** (from the UI Policy Action)
 - **State restrictions** (from the onCellEdit Client Script) are functioning as expected

The screenshot displays the ServiceNow 'Incident - Create INC0010012' form. The left sidebar shows the navigation menu with 'Incident' selected. The main form area contains various fields: 'Number' (INC0010012), 'Channel' (None), 'State' (New), 'Category' (Inquiry / Help), 'Subcategory' (None), 'Service' (empty), 'Service offering' (empty), 'Configuration item' (empty), 'Short description' (testing UI policy), 'Description' (empty), 'Urgency' (1 - High), 'Priority' (1 - Critical), and 'Assignment group' (Software). The 'Assigned to' field is highlighted with a red box and shows 'Beth Anglin'. Below the form, there is a 'Related Search Results' section with a search bar and a dropdown menu.

Test Output 3

Activity 3: Reverse Condition Test

1. **Open an Existing Incident:**

Go to Incident → Open and select an Incident where **Impact** is currently set to **High**.

2. **Change Impact:**

Update the **Impact** field from **High** to **Medium**. This will test the **Reverse if false** functionality of your UI Policy and the behavior of your Client Scripts.

3. **Verify the Field Behavior:**

- **Assigned To** should no longer be mandatory.
- **Urgency** should now be editable, meaning the read-only UI Policy action is reversed.

4. **Save the Record:**

Click **Submit** to save the changes. The record should save successfully without errors, confirming that the reverse condition works as intended.

The screenshot displays the ServiceNow Incident form for record INC0010012. The interface includes a left-hand navigation pane with options like 'Incident', 'Watched Incidents', and 'Incident Properties'. The main form area contains various fields: 'Number' (INC0010012), 'Caller' (Adela Cervantsz), 'Category' (Inquiry / Help), 'Subcategory' (None), 'Service' (None), 'Service offering' (None), 'Configuration item' (None), 'Short description' (testing UI policy), and 'Description'. The 'Impact' field is set to '2 - Medium', 'Urgency' is set to '1 - High', and 'Assigned to' is set to 'Software'. The 'Impact' and 'Urgency' fields are highlighted with red boxes, indicating they are the focus of the test. The 'Assigned to' field is also highlighted with a red box, showing it is now editable. The form is titled 'Incident - INC0010012' and includes buttons for 'Discuss', 'Follow', 'Update', 'Resolve', and 'Delete'.

Test Output 4

Activity 4: Test List Edit Blocking

1. Navigate to the Incident List:

Go to Incident → All to view all Incident records in a list view.

2. Attempt a List Edit:

- Locate any Incident in the list.
- **Double-click the State field** to try editing it directly from the list.

3. Verify the Behavior:

- An **alert message** should appear, indicating that direct changes to the State field are not allowed.
- The **State value should remain unchanged**, confirming that the onCellEdit Client Script is working correctly.

The screenshot shows the ServiceNow interface for the 'Incidents' list. The left-hand navigation pane has 'Incident' selected, with 'Open' also highlighted. The main table displays a list of incidents. The following table represents the data visible in the screenshot:

Number	Opened	Short description	Caller	Priority	State	Category	Assignment group	Assigned to	Updated	Updated by
INC0010012	2024-01-14 02:15:14	testing UI policy	Adela Cervantes	2 - High	New	Inquiry / Help	Software	(empty)	2024-01-14 03:19:11	admin

Test Output 5

Activity 5: Test Form-Based Update

1. **Open the Incident Record:**
Navigate to the same Incident record you used in previous tests.
2. **Change the State:**
On the **Incident form**, update the **State** field to a new value. This tests that changes via the form (not the list) are allowed.
3. **Click Update:**
Save the record by clicking **Update**.
4. **Verify the Result:**
 - The **State change should be saved successfully**.
 - Confirm that other fields, such as **Assigned To** and **Urgency**, still follow the configured UI Policy and Client Script rules.

Test Output 6

ServiceNow Incident form for INC0008111. The form includes fields for Number, Caller, Category, Service, and State. A context menu is open over the 'Save' button, showing options like 'Add to Visual Task Board', 'Copy Incident', 'Create Incident Task', 'Create Outage', 'Create Problem', 'Create Request', 'Create Child Incident', 'Create Normal Change', 'Create Standard Change', 'Create Emergency Change', 'Refresh Impacted Services', 'Metrics Timeline', 'Follow on Live Feed', 'Analyze Access', 'Configure', 'Export', 'View', 'Create Favorite', 'Copy URL', 'Copy sys_id', 'Show XML', 'History', and 'Reload form'. The 'State' field is set to 'In Progress'.

ServiceNow Incidents list view. The table shows a list of incidents with columns for Number, Opened, Short description, Caller, Priority, State, Category, Assignment group, Assigned to, Updated, and Updated by. The incident INC0008111 is highlighted in blue.

Conclusion

The Implement Client Script & UI Policy (Incident) micro project effectively demonstrates how **UI Policies** and **Client Scripts** can work together to enforce dynamic field behavior, automate updates, and prevent incorrect data submission on Incident forms. By using `onChange`, `onSubmit`, and `onCellEdit` scripts alongside UI Policy actions, the project ensures fields like **Assigned To** and **Urgency** respond appropriately to changes in **Impact**, maintaining clean and
